

There are a few things that men need to understand. Waxing is not just for the girls, and it's really not that painful.

There is limited re-growth issues, and minimal stubble. This means less scratching.

There is nothing worse than seeing a guy in public scratching his genitals.

Two types of wax are used in men's waxing.

Natural Look Liquid Gold - I Consider being one of the most premium strip waxes available to the industry. Strip wax is used for large areas on the body, backs, stomachs, chests, legs & outer buttocks. Strip wax is a soft wax that is removed with a strip of fabric / fiber.

Mancine White Ultra Flexxx - This is a hot wax used on more delicate areas of the body, Ultraflexxx is specially formulated for men & their neighter regions. The wax sets semi firm to be removed without a strip.
